

SlipAlert

Brought to you by Liberty Risk Reduce

Slips, trips and falls continue to be a significant cause of accidents in the workplace. Liberty Specialty Markets, as part of our wider risk management offering, provides free access to SlipAlert through our Liberty Risk Reduce Portal.

Over a third of all major injuries reported each year are caused as a result of a slip or trip (the single most common cause of injuries at work). Prevention of slips in your premises can help avoid serious accidents and associated costs. It may also help avoid legal actions brought by an injury involving an employee or member of the public.

SlipAlert is a piece of equipment that conducts slip resistance tests to help prevent slips in your premises.

The equipment is easy to use and requires minimal training and no calibration. It allows for the quick testing of your floors to determine which floors are safe and which will need to be replaced or be carefully managed.

What are the benefits?

- Slip testing as part of your risk assessment process will help determine who might be harmed and how and what controls could be needed.
- Slip testing can help with evaluating the effectiveness of your cleaning processes in terms of methods used and cleaning schedules.
- Depending on the task being carried out, slip accidents may also cause persons to fall from height or suffer a musculoskeletal injury should they be carrying a load when they slip. Slip testing as part of your overall management process can help avoid such injuries which can be serious or even fatal.
- The prevention of slips and trips will help to maintain employee morale and avoid downtime/costs from investigating slip accidents

How to sign up?

To find out how SlipAlert can support you and your business contact your Customer Relationship Manager or Risk Engineer. You can also reach the team at riskcontrol@libertyglobalgroup.com
